DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-15, 18, 19 and 22-46 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the recitation "wherein the electronic display is not associated with the inherent function of the product" is indefinite since information about a product is "associated" with the function of the product. Also the recitation "wherein the information is about the product" is indefinite since the product is not even being claimed as part of the invention.

In claim 9, the recitation "wherein the electronic display is not associated with the inherent function of the product" is inaccurate and indefinite since in the body of the claim applicant sets forth the step of "attaching an electronic display to the product" and thus such display is in fact part of the product. Furthermore the information about eh product is clearly "associated" with the inherent function of the product.

In claim 29, the recitation "information comprising label information, product information or source information" is indefinite since the product is not even being claimed as part of the invention.

Art Unit: 3765

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1, 2 and 5-8, 29, 30 and 33-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Gomersall et al. (4500880).

The disclosure of Gomersall et al. (4500880) teaches the invention as claimed including a label (14) for a product comprising: a) a base (14H) adapted to be fixed to said product,

b) an LCD (32) electronic display panel affixed to said base and not associated with the inherent functioning of the product; and c) a programmable circuit (note figure 12) operatively connected to said display panel, said programmable circuit being programmed to output label information to said display panel for display thereon. The preamble recitation of intended use, i.e. "for a product" is considered non-controlling as to the metes and bounds of the claim since it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. Ex parte Masham, 2 USPQ2d 1647 (1987). In this case the label of Gomersall et al. (4500880) clearly

Application/Control Number: 09/902,834 Page 4

Art Unit: 3765

has the capability of being adapted to be fixed to a product and whether it actually is, or might be, used in such a manner depends upon the performance of a future act of use rather than a structural distinction in the claims.

Claims 1-13 and 16, 18, 19, 26, 29-35, 38-42, 44-55, 58-60 and 62-90 are insofar as definite are rejected under 35 U.S.C. 102(e) as being anticipated by Fitch (5912653).

Fitch (5912653) teaches the invention as claimed including an apparatus having a label (as seen in figure 3) for a product comprising: a) a base (16) adapted to be fixed to said product, b) an LCD (12) electronic display panel affixed to said base and not associated with the inherent functioning of the product; and c) a programmable circuit (see figure 6) operatively connected to said display panel, said programmable circuit being programmed to output label information to said display panel for display thereon. Fitch (5912653) also teaches insofar as definite the method for labeling a product of claims 9-15 including attaching an electronic display to the product, and programming the electronic display to display label information. Note the electronic display is a liquid crystal display with a backlight.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 14, 15, 27, 28, 36, 37, 56 and 57 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fitch (5912653).

The disclosure of Fitch (5912653)) teaches the invention substantially as claimed as indicated above in the rejection to claim 9. The disclosure of Fitch (5912653)does not set forth a pressure-activated switch or touch screen. The examiner takes Official notice that pressure activated switches and touch screens are typically used in LCDs. It would have been obvious at the time the invention was made to one of ordinary skill in the art to which the invention pertains to provide the LCD of Fitch (5912653) with a pressure activated switch and a touch screen in order to control the display functions of the LCD.

Response to Arguments

Applicant's arguments filed 6/16/05 have been fully considered but they are not persuasive.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the

Application/Control Number: 09/902,834 Page 6

Art Unit: 3765

advisory action. In no event, however, will the statutory period for reply expire later than

SIX MONTHS from the mailing date of this final action.

The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Danny Worrell whose telephone number is 703/308-0889.

The examiner can normally be reached on Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, John Calvert can be reached on 703/305-1025. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published

applications may be obtained from either Private PAIR or Public PAIR. Status

information for unpublished applications is available through Private PAIR only. For

more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have

questions on access to the Private PAIR system, contact the Electronic Business Center

(EBC) at 866-217-9197 (toll-free).
